C Programming – Summer Training

Assignment 2 Submission

Programs 1 – 10

Contents

Project 1 — Task 2.1

WAP in C to find the greatest number among three numbers

Source Code

```
// Task 2.1 // WAP in C to find greatest number between three numbers

#include<stdio.h>

void main(){
    printf("======================================\nTHIS PROGRAM CALCULATES GREATEST
        NUMBER\n======================================");
    int first_no,second_no,third_no;

    printf("\nEnter First Number : ");
    scanf("%d",&first_no);

    printf("\nEnter Second Number : ");
    scanf("%d",&second_no);

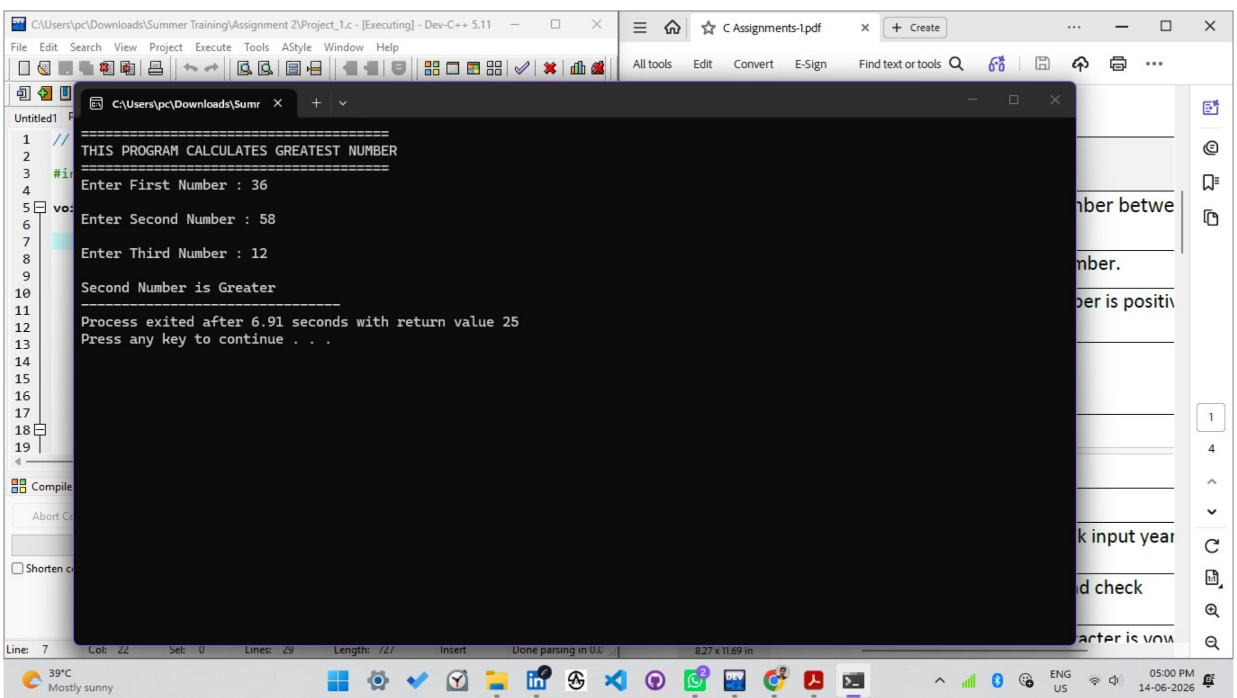
    printf("\nEnter Third Number : ");
    scanf("%d",&third_no);

    if(first_no>second_no && first_no>third_no ){
        printf("\nFirst Number is Greater");
    }

    else if(second_no>first_no && second_no>third_no){
        printf("\nSecond Number is Greater");
    }

    else{
        printf("\nThird Number is Greater");
    }
}
```

Output



Project 2 — Task 2.2

WAP in C to find odd & even number

Source Code

```
// Task 2.2 // WAP in C to find odd & even number.

#include<stdio.h>

void main(){
    int num;

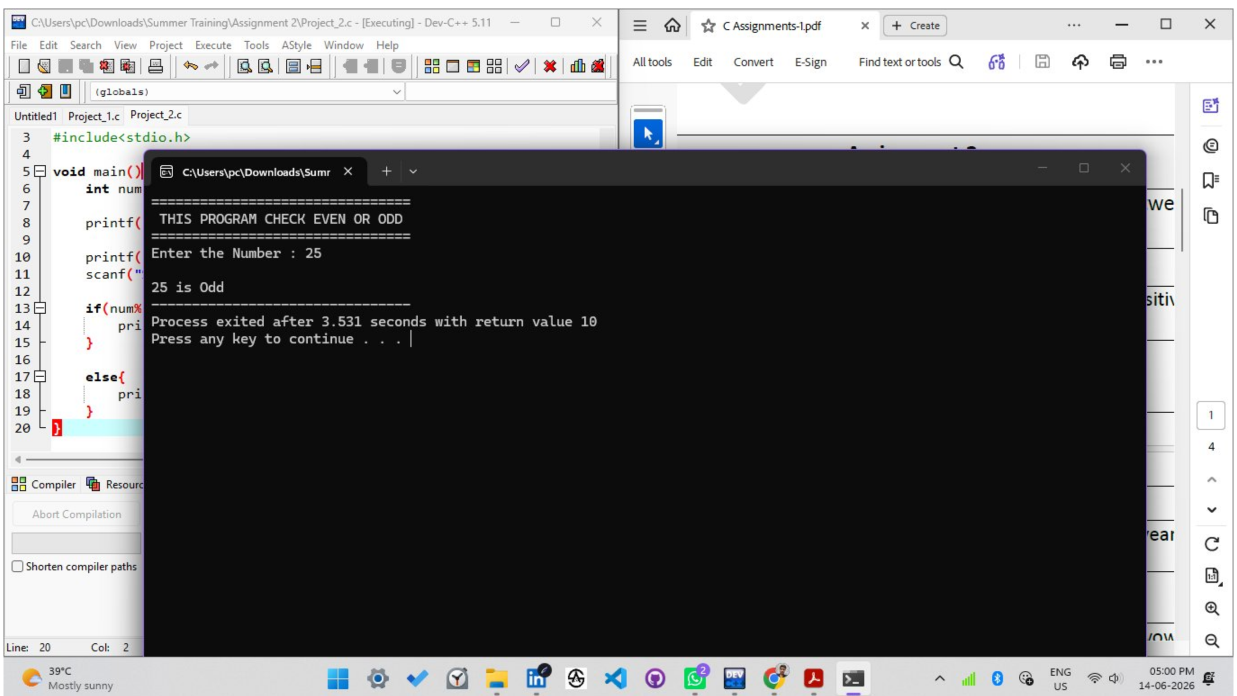
    printf("================================\n THIS PROGRAM CHECK EVEN OR ODD
        \n================================");

    printf("\nEnter the Number : ");
    scanf("%d",&num);

    if(num%2==0){
        printf("\n%d is Even",num);
    }

    else{
        printf("\n%d is Odd",num);
    }
}
```

Output



Project 3 — Task 2.3

WAP in C to check whether the entered number is positive or negative

Source Code

```
// Task 2.3 WAP in C to check entered number is positive or negative;

#include<stdio.h>

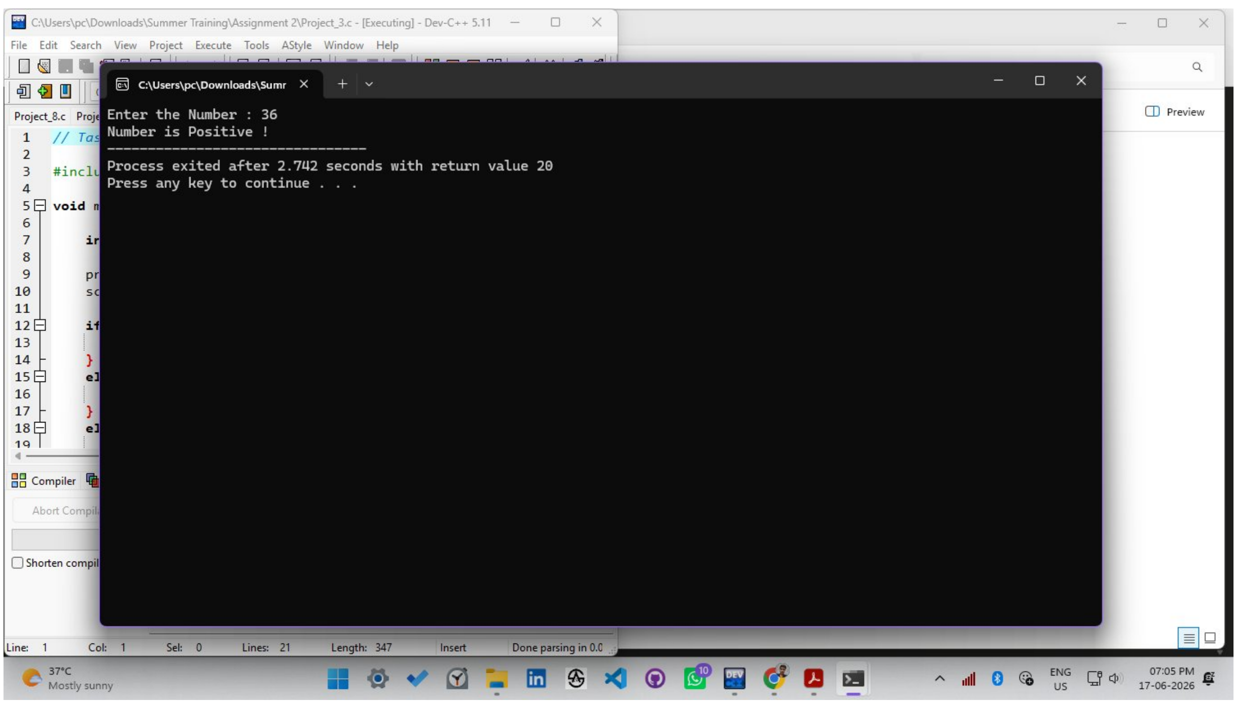
void main(){

    int num;

    printf("Enter the Number : ");
    scanf("%d",&num);

    if(num>0){
        printf("Number is Positive !");
    }
    else if(num<0){
        printf("Number is Negative !");
    }
    else if (num==0){
        printf("Number is Zero!");
    }
}
```

Output



Project 4 — Task 2.4

WAP in C to enter a year and check if it is a leap year or not

Source Code

```
//Task 2.4 WAP in C to enter a year and check input year is leap year or not

#include<stdio.h>

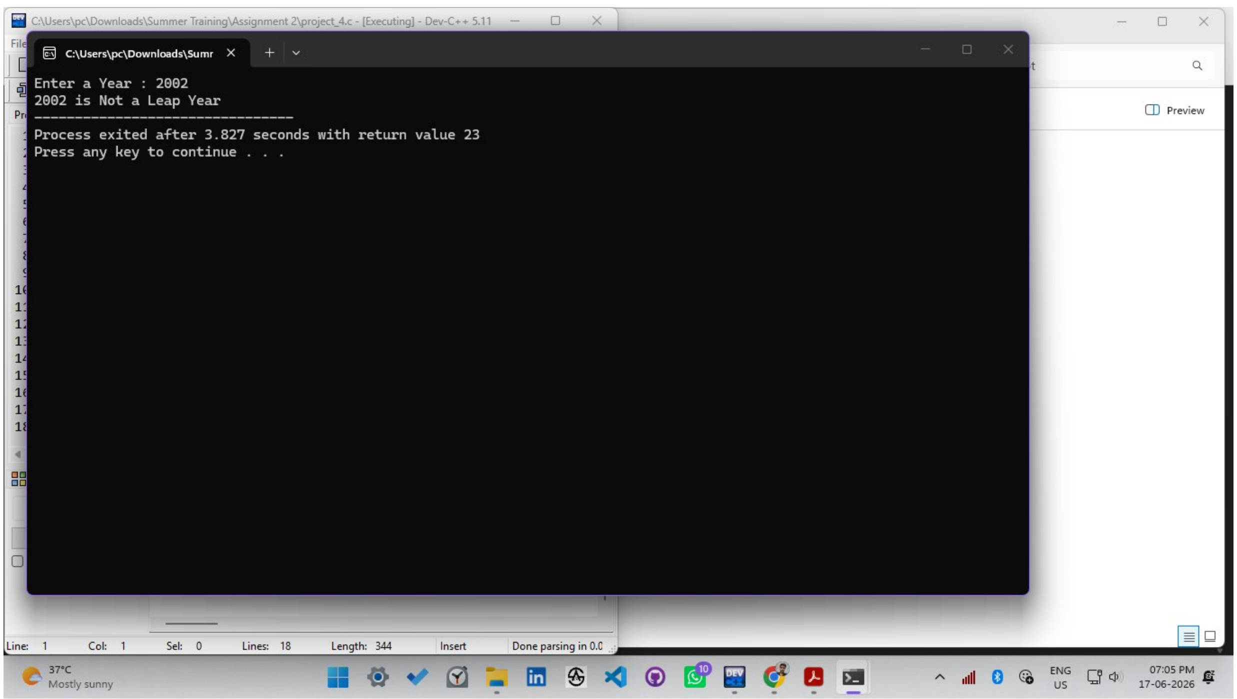
void main(){
    int year;

    printf("Enter a Year : ");
    scanf("%d",&year);

    if((year % 4 == 0 &&  year % 100 != 0) || year % 400 == 0){
        printf("%d is Leap Year!",year);
    }

    else{
        printf("%d is Not a Leap Year",year);
    }
}
```

Output



Project 5 — Task 2.5

WAP in C to input a character and check if it is uppercase or lowercase

Source Code

```
//Task 2.5 WAP  in C to input a character and check character is in uppercase or lowercase

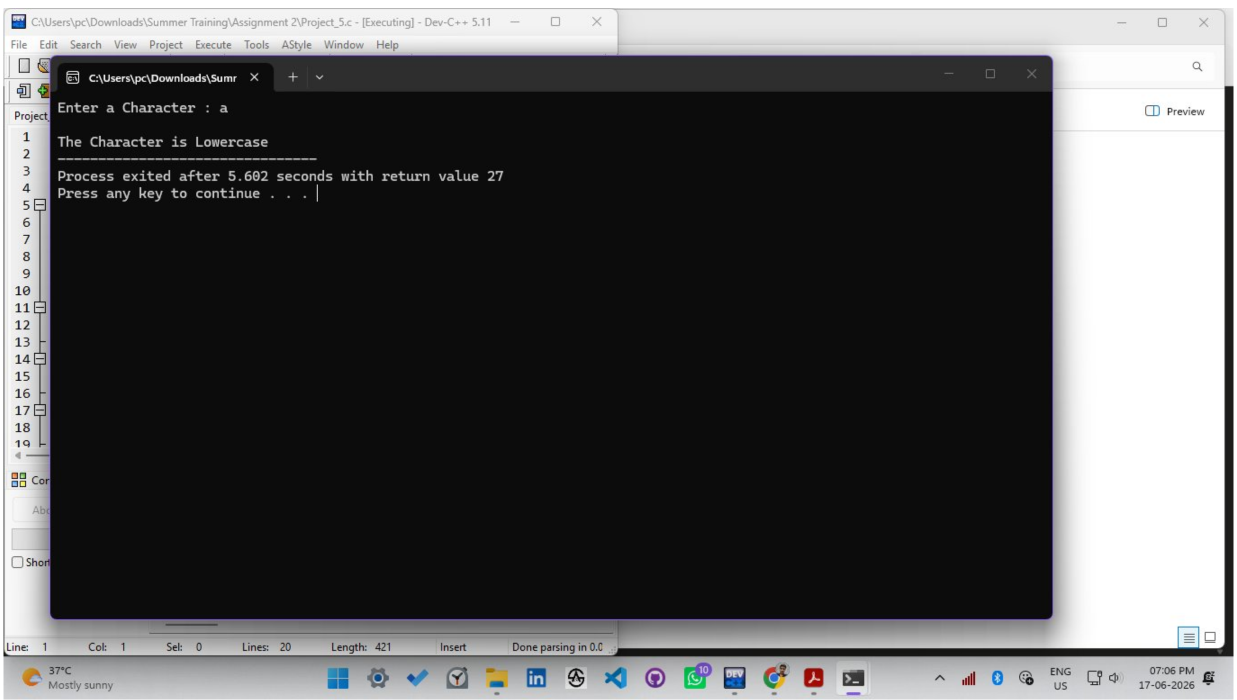
#include<stdio.h>

void main(){
    char ch;

    printf("Enter a Character : ");
    scanf("%c",&ch);

    if(isupper((unsigned char)ch)){
        printf("\nThe Character is Uppercase");
    }
    else if(islower((unsigned char)ch)){
        printf("\nThe Character is Lowercase");
    }
    else {
        printf("Please Enter a Character");
    }
}
```

Output



Project 6 — Task 2.6

WAP in C to check whether a given character is a vowel or a consonant

Source Code

```
// Task 2.6 WAP in C to check that given character is vowel or consonent

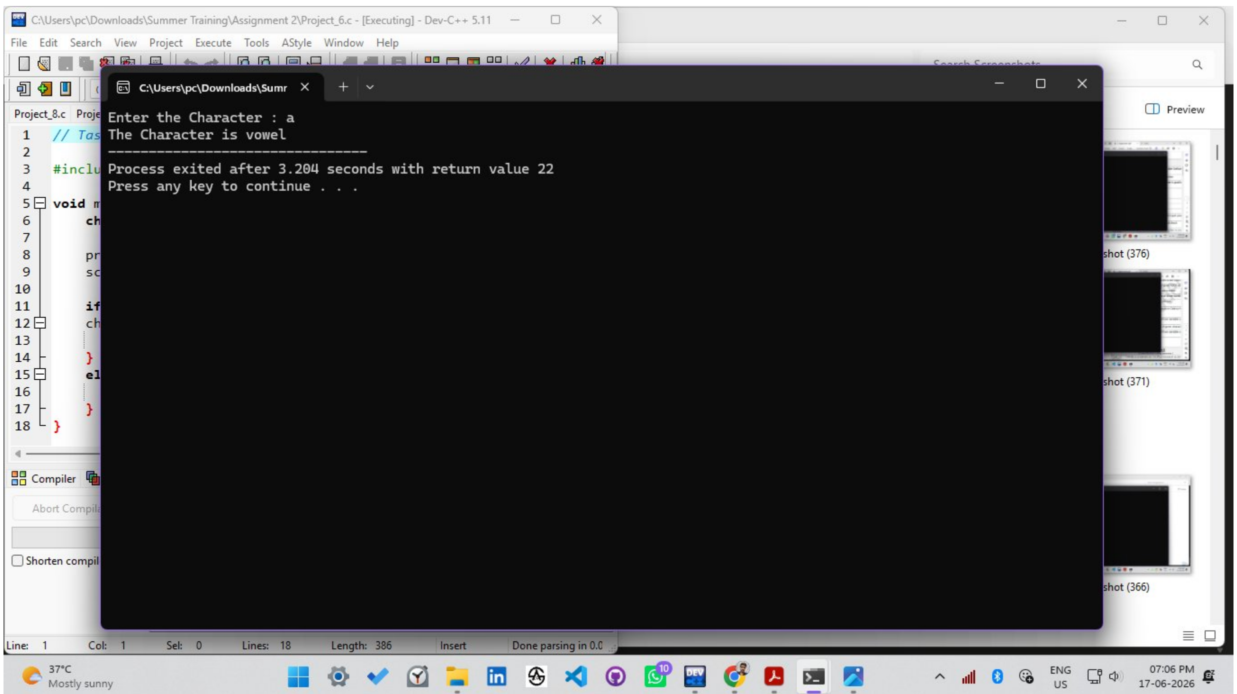
#include<stdio.h>

void main(){
    char ch;

    printf("Enter the Character : ");
    scanf("%c",&ch);

    if(ch=='a'|| ch=='e'|| ch=='i'|| ch=='o'||ch=='u'||
    ch=='A'|| ch=='E'|| ch=='O'|| ch=='U'||ch=='I'){
        printf("The Character is vowel");
    }
    else{
        printf("The Character is Consonent");
    }
}
```

Output



Project 7 — Task 2.7

WAP in C to find the greatest number among four numbers using the ternary operator

Source Code

```
// Task 2.7 WAP in C to find greatest number between four using ternary operator

#include<stdio.h>

void main(){
    int a,b,c,d,max;

    printf("Enter First Number : ");
    scanf("%d",&a);

    printf("Enter Second Number : ");
    scanf("%d",&b);

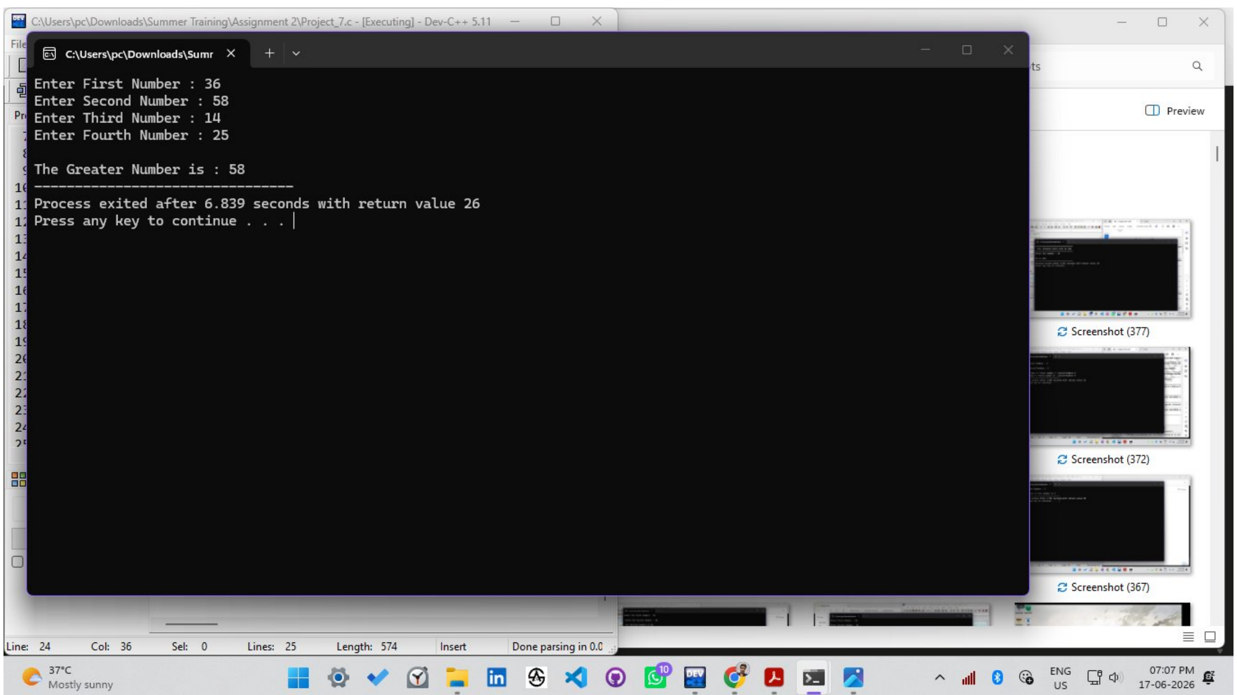
    printf("Enter Third Number : ");
    scanf("%d",&c);

    printf("Enter Fourth Number : ");
    scanf("%d",&d);
    printf("\n");

    max = (a > b) ? ((a > c) ? ((a > d) ? a : d) : ((c > d) ? c : d))
                   : ((b > c) ? ((b > d) ? b : d) : ((c > d) ? c : d));

    printf("The Greater Number is : %d",max);
}
```

Output



Project 8 — Task 2.8

WAP in C to show the result of a student

Source Code

```
//Task 2.8 WAP in C to show the result of the student

#include<stdio.h>

int main(){
    int marks[5];
    int total, i;
    float percentage;
    int grade_bucket;

    for(i = 0; i < 5; i++){
        printf("Enter marks for subject %d: ", i+1);
        scanf("%d", &marks[i]);
    }

    total = marks[0] + marks[1] + marks[2] + marks[3] + marks[4];
    percentage = total / 5.0;   // assuming each subject is out of 100

    printf("\nTotal marks: %d\n", total);
    printf("Percentage: %.2f%%\n", percentage);

    grade_bucket = (int)(percentage / 10);  // e.g. 83.5 -> 8

    switch(grade_bucket){
        case 10:
        case 9:
        case 8:
            printf("Result: PASS - Grade A\n");
            break;
        case 7:
            printf("Result: PASS - Grade B\n");
            break;
        case 6:
            printf("Result: PASS - Grade C\n");
            break;
        case 5:
            printf("Result: PASS - Grade D\n");
            break;
        default:
            printf("Result: FAIL\n");
            break;
    }

    return 0;
}
```
